## About

- **Old JEE web developer**
- **Today:**
  - **Computer teacher:**
    - Hardware, Operating Systems, Networking, Programming
  - **Freelance Trainer:**
    - Java, Android
    - JavaScript, jQuery
    - JSF, Spring, Hibernate
    - Groovy & Grails
  - **I like to develop**

- **For hackathons lovers**
- **Meetup:** <http://www.meetup.com/Hackathon-Lovers/>
- **Twitter:** <http://twitter.com/HackathonLovers>

- Is a **tweets analyzer** which extracts semantic information to know if the general tweets feeling about a topic is positive or negative.
- **Web:** <http://tweetssentiment.com/>
- **Twitter:** <http://twitter.com/TweetsSentiment>

- My nick: **asanzdiego**
- AboutMe: <http://about.me/asanzdiego>
  - GitHub: <http://github.com/asanzdiego/>
  - Twitter: <http://twitter.com/asanzdiego>
  - Blog: <http://asanzdiego.blogspot.com.es>
  - LinkedIn: <http://www.linkedin.com/in/asanzdiego>

- **This work is licensed under a:**
  - Creative Commons Attribution 3.0
- **The program source code are licensed under a:**
  - GPL 3.0

II

## Instalation and how to use

- Pandoc 1.11.1 (needs to be installed)
- Deck.js (included)

- First **copy the doc folder and rename it as you like**. This is not necessary but helps you organize your documents.
- **Create the md files** that you want to generate. The md files are Markdown files which are nothing more than plain text files with extension md, and a lightweight markup (we should know it but it is very simple).
- Once created the md files, we can **generate html, html-slides y pdf-beamer with a script**.

- To **convert all md files of all the folders** go to the root folder and execute:

```
./build.sh
```

- To **convert all md files of one folder** go to the root folder and execute:

```
./build.sh [folder_name]
```

- [F] - Find text
- [M] - Miniature slides
- [G] - Go to slide number
- [P] - Pointer mouse
- [ctrl]+[+] - Zoom in
- [ctrl]+[-] - Zoom out
- [ctrl]+[wheel mouse] - Zoom in/out
- [space] - Next page
- [intro] - Next page
- [page up] - Next page
- [up arrow] - Next page
- [right arrow] - Next page
- [backspace] - Previous page
- [page down] - Previous page
- [down arrow] - Previous page
- [left arrow] - Previous page
